INDEX.

A

Adcock, R. J., 222.
Advanced Physiography, 336.
Aerolite, Origin of, 284.
Aid for MESSENGER Illustration, 469.
Aid to Astronomical Research, 473,
Algebra, by Taylor, 144.
Algol, Spectroscopic Observations of, 237.
Algol System, 285.
American A. A. S., Meeting of, 333.
American Metrological Society, 235.
Andromeda Nebula, 42.
Annuario del Observatorio, Tacubayo, 138.
Annular Eclipse of the Sun, June 17, 1890, 277.
Another Lost Comet, 275.
Associate Solar Phenomena, 279.
Astronomical Papers of the Am. Ephemeris, 427, 472.
Astronomical Photography, Hill's Lecture on, 188.
Astronomical and Physical Society of Toronto, 378.
Astronomical Society of the Pacific, 24, 106, 89, 212, 231, 282, 296, 429.
Astronomy, Young's Elements of, 95.
Astronomy for the year 1886, 90.
Astronomy, Progress of in 1889, 101.
Astronomy New and Old, 96.
Astronomy, Last Meeting A. A. A. S., 380.
Astronomy, Elementary Lessons in, 192.
Astronomy, Text Book of, 382.
Atmosphere Above Highest Clouds, Motion of, 329.

B

Backhouse, Thomas W., 337.
Bacon, Charles A, 136, 278, 428, 467.
Bailey's Beads, 170.
Baker, Arthur L., 382.
Barnard, E. E., 119, 277, 282, 420.
Barnes, Willis L., 426.
Bibliographie Generale de l'Astronomie, 91.
Bigelow, F. H., 145.
Bond, G. P., 78.
Book Notices, 95, 96, 143, 144, 190, 239, 287, 336, 381, 430.
Books received, 96, 336, 384.
Brashear, J. A., 42, 204.
Break Circuit for Clocks, 124, 233.
Brennan, Martin S., 96.
Bright Meteor, 324.
Brightness of Stars, on Determination of by Photography, 12.
Bright Streaks from Moon Craters, 281.
British Astronomical Association, 456.
Brookings, E. J., 93, 149.
Brooks, W. R., 229, 466.
Brown University, New Telescope for, 140.
Bruce, Miss C. W., 329.
Burckhalter, Charles, 43, 106, 204, 300.
Burnham, S. W., 282, 299, 449.

C

Calculus, Smith's Elements, 143.
Calculus, Hardy's Text Book, 384.
Camden Astronomical Society, Meeting of, 460.
Celestial Phenomena Explicable by Meteors, 260.
Central Eclipse of the Sun, 464.
Chamberlin Observatory, Plan of, 48.
Chambers, G. F., 203.
Chambers' Handbook of Astronomy, 287, 383.
Chandler, Charles H., 233.
Charroppin, C. M., 96, 197.
Clark, A. G., 44.
Clark, Jacob M., 155.
Clerke, Agnes M., 300.
Coakley, George W., 3, 67.
Comet 1881, V (Denning's), 38; Ephemeris of, 87.
Comet 1882 II (Great Comet), 226.
Comet 1884 II (Barnard) 37; Elements of, 87.
Comet 1884 III (Wolf), 184.
Comet 1885 II, Orbits of, 184.
Comet 1886 VII (Finlay), 135.
Comets of 1887-8, List of, 38.
Comet 1888 III, Elements of, 88.
Comets of 1889, List of, 184.
Comet 1889 I (Barnard, Sept. 2, 1888), Elements and Ephemeris of, 135, 185, 227, 275, 276.
Comet 1889 II (Barnard, March 31), Elemenst of, 421.
Comet 1889 IV (Davidson, July 19), Elements of, 88, 228.
Comet 1889 V (Brooks, July 6), Elements of, 40; Ephemeris of, 40, 125.
Comet 1889 VI (Swift, Nov. 17), Observations of, 40. Elements of, 88, 228.
Comet 1890 I (Borrelly, Dec. 12, 1889), Discovery of, 40; Elements of, 88, 90, 275.
Comet 1890 II (Brooks March 19), Discovery, Elements and Ephemeris of, 229, 276, 323, 324, 465.
Comet *b* 1890 (Coggia), Its return, 37.
Comet *c* 1890 (Denning), Ephemeris of, 374, 419.
Comet *d* 1890 (Barnard, Oct 6), Re-discovery, Comet of D'Arrest, 420, 419, 465; Expected Return, 38, 227; Ephemeris of, 466.
Comet *e* 1890 (Zona) 466; Elements and Ephemeris of, 466.
Comet *f* 1890, (Spitaler), 466.
Comets, A Group of, 228.
Comets of Short Period, 277.
Comet of Lexell, It's Return, 116.
Comet of Brorsen, It's Return, 37, 38; Sweeping Ephemeris of, 38.
Comet Discoverers, 122. 189, 235.
Companion to the Observatory for 1890, 45.
Companion to Sirius, 282.
Comstock, George C., 78, 144, 186.
Corona, Photographing it without an Eclipse, 48.
Cordoba Observatory, 86.

Cortie, A. L., 431.
Crusenberry, W. A., 236.
Current Celestial Phenomena, 33, 83, 131, 178, 224, 270, 320, 370, 413, 461.

D

Delta and Mu Centauri Show F Hydrogen Line Bright, 91.
Delta Cygni's Orbit, 428.
Denning, W. F., 122, 140, 141, 235, 438.
Dewey, John H., 431.
Dome Repairs at Ann Arbor, 45.
Donohue Medal of A. S. P., 231.
Double Stars Discovered at Washburn Observatory, 299.
Double Star Observations at Washburn Observatory, 78.
Double Star South, 503, Proper Motion of, 183.
Double Star Struve, 228, Orbit of, 183.
Dust Particles in the Air, 234.

E

Eadie, John H., 427.
Edgecomb, D. W., 52, 392.
Eiffel Tower and Science, 31.
Ellery, R. J. 232.
Elliptic Functions, by Baker, 382.
English Mechanic, 106.
English Mile, 155.
Ennis, Jacob, Death of, 185.
Ephemerides of Saturn's Satellites, 36, 86, 133, 181, 225.
Equation of the Ellipse through Five Points, 200, 222, 268.
Errata, 48, 143.
Espin, T. E., 237.

F

Faith Healing, 239.
Familiar Talks on Astronomy, 190.
Father Perry, Sketch of his Life, 431.
Fire Ball at Hartford, 40, 137.
Fleming, M., 380.
Forty-inch Lens for Wilson's Peak, 44, 422.
Fresnel's Mirror Experiment, 187.
Frisby, E., 419.
Frost, Edwin B., 10, 183.
Furness, H. H., 200.

G

General Catalogue of Stars, Suggestions for a New one, 203.
Geometry, Bowser's Elements of, 430.
Geometry, Wentworth's, 144.
Gerrish, Willard P., 111, 124, 233.
Gore, J. E., 191.
Gravity at Mt. Hamilton and San Francisco, 44.
Gravity, The Constant of, 141.
Great Nebula of Orion, 1.
Gift of $2,500 to A. S. of the Pacific, 43.

H

Hale, George E., 378.
Halsted Observatory, New Electrical Plant for, 90.
Hancock, Harris, 293.
Hanging Level Attached to a Portable Transit, On the Proper use of, 433.
Harvard College Observatory Annals, 188; Reports, 281; Photographic Work, 328.
Hazen, H. A., 330.
Haynes, Professor A. E., 43.
Hill, G. A., 88, 89.
Holden, E. S., 12, 45, 119, 121, 122, 124, 167, 236, 282.
Hough, G. W., 139, 161, 173.
Howe, H. A., 234.
How to Measure the Invisible, 406, 442.
Houzeau, J. C., 91.
Huggins, William, 22, 314.
Huggins, Mrs. 314.
Hutchins, C. C., 90.
Hyginus, Lunar Crater and Rill, 119.

I

Illumination for a Position Micrometer, 161.
Ingraham, J. E., 378.
Iowa Meteor, 283.
Ireland W., 140.

J

Jenks, Aldro, 255.
Jones, George S., 353.
Julian Day, 280.
Jupiter's Red Spot, Rotation of, 140.
Jupiter's Third Satellite, Dark Transit of, 426. 474.
Jupiter, Obs. of, 475.
Jupiter's Southern Belt, Duplicity of, 474.

K

Keeler, James E., 469,
Klotz, O. M. J., 324.
Koreshan Astronomy, 418.

L

Large vs. Small Telescopes, 47.
"Largest Glass Yet," 332.
Latest Latitude Results at Greenwich, 330.
Latitude by the Zenith Telescope, 45.
Latitude, Variation of, 422.
Lawrence University Observatory, 421.
Leander McCormick Observatory, Publication of, 423.
Leavenworth, F. P., 47
Lick Great Equatorial, Stability of, 45, 97.
Lick Observatory Photographs, 282
Lightning Spectra, 285.
Lockyer, J. Norman, 192.
Logarithmic Tables by Jones, 240.
Loomis, Professor Elias, 241.
Lunar Appulse, 277.
Lyman, Chester Smith, 142, 400.

M

Mann, Newton M, 385.
Mars, Canals of, 378.
Mars, Physical Condition of, by Brett, 122.
Mars, Visual Observation of the Surface of, 369.
Mathematical Magazine, 238.
Maunder, Thomas F., 457.
McFarland's Perpetual Calendar, 378.
McLouth, Lewis, 428.
Mechanics, by Wright, 381.
Mechanics of the Solar System, 186.
Melbourne Observatory Publication, 232.
Memoirs of the Royal Aststronomical Society, 421.
Meridian Circle of Cincinnati Observatory, 46.
Men of Science and the General Public, 424.
Mendenhall, T. C., 426.
Mercury's Rotation Period, by Schiaparelli, 167.
Meteor Observations by Denning, 141.
Meteor seen at Washington, 41.
Meteoric Theory of Comets, 216.
Method of Least Squares, 143.
Minima of Stars of Algol Type, 85, 134, 180, 225, 274, 417, 464.
Mitchell, Maria, 49.

Modern Instruments, Requirements of, 204.
Monck, W. H. S., 216, 260, 289, 363, 454.
Moon, The Temperature of, 177.
Motion of Hyperion, 236.
Motion of Atmosphere at Great Elevation, 472.
Mountain Observations, 45.
Mu and Delta Centauri, F. Line of Hydrogen Bright, 91.
Myers, C. E., 268.

N

Nebulæ, News from, 27.
Nebula of Orion, Principal Line in Spectrum, 303.
Nebulous Ring, 47.
New Artificial Horizon Apparatus, 91.
News and Notes, 42, 89, 139, 185, 231, 281, 328, 377, 421, 469, 475.
New Astronomical Society in England, 378.
New Telescope for University of Mississippi, 377.
New Telescope for Carleton College Observatory, 377.
New Telescope for Chicago, 378.
New Naval Observatory, 471.
Newton. H A. 2,41.
Notices from the Lick Observatory, 12, 116, 167.
November Meteors (1889), 93.

O

Observations Corrected by Least Squares, 458.
Observatory Local Patronage, 64, 113, 139, 231, 331.
Observatory of Rio Janeiro Publications, 432.
Observatory Time Service, Statistics on, 129.
Occul.ations for Latitude 43° 3′, Table for, 89, 133.
Occultation of Jupiter, Sept. 3, 1889, 148.
Occultations, Visible at Washington, 36, 85, 180, 226, 274, 322, 373, 416, 463.
Our Inheritance in the Great Pyramid, 288.
Our Knowledge of Mars, 450.

P

Packer, D., 381.
Paris Observatory, 282.
Parker, W. H., 190.
Parkhurst, Henry M., 406, 442, 476.
Pathway of the Spirit, by Dewey, 431.
Peck, H. A., 89.
Perry, Stephen J., Biography of, 197.
Peters, Dr. C. H. F., 439.
Perry Memorial, 470.
Phases of the Moon, 37, 86, 134, 181, 225, 274, 323, 372, 416, 463.
Phenomena of Jupiter's Satellites, 180, 226, 273, 323, 372, 416, 464.
Photographic Apparatus of Lick Telescope, 187.
Photographic Chart of the sky, 428.
Photographic Notes, 92, 138, 238, 286, 334, 378, 425, 475.
Photographic Photometry, 121.
Photographing Dark Part of the Moon, 282.
Photography in Meridian Observations, 193.
Photographs of the Surface of Mars, 254.
Photometer, A Compound Wedge Form, 163.
Phythian, R. L., 63, 64.
Pickering, E. C., 80, 233, 329, 474.
Pickering, W. H., 1, 148, 254, 369, 378.
Pierson, Wm. M., 42.
Pioneer Time Service by Observatories, 139.
Place of Tycho Brahe's Star, 449.
Planet Notes, 63, 83, 131, 178, 223, 270, 320, 370, 413, 461.
Planet Tables, 35, 54, 132, 179, 224, 271, 321, 371, 415, 462.
Planetoids, New, No. (288), (289), 181, (290), 182, (291), (292), 277, (295), (296), (297), (298), 376, (299), (300), 465.
Planetoid No. (11) Parthenope, Ephemeris of, 468.
Polaris and Companion, 427.
Polarized Reflections in the Nicol Prism, 266.
Poor, C. H., 93.
Porter, J. G., 46, 439.
Positions of Total Eclipse Jan. 1, 1889, 140.
Pritchett, H. S., 63, 64, 113.
Problems Solved, 326.
Ptolemai's Crater, Light at Bottom, 43.
Ptolemy's Argument against the Rotation of the Earth, 293.
Publications of Yale University, Pt. II. Vol. I, 142.

Q

Quartz Fibre for Micrometer Wires, 90.
Queries, 82.

R

Radiant Points of Meteors, 363, 438.
Rain Fall at Mt. Hamilton (1880-9), 44.
Raphael and Albrecht Durer's Contributions to Astronomy, 120.
Recent Longitude Determinations, 426.
Reed, E. E., 374.
Refraction, Simple Approximate Formula for, 186.
Refinements of Modern Instruments, 188.
Report of H. C. Observatory (44th Annual), 44.
Rigel and the Great Nebula of Orion, 425.
Riggs, R. B. 137.
Rings of Saturn, Curvature of Shadow of, 255, 285.
Rings of Saturn, On the Stability of, 3, 67.
Ritchie, John, 450.
Rockwell, C. H. 94.

S

Sadler, Herbert, 342.
Saegmuller, G. N., 48.
Safford, Truman H., 45, 193, 422, 433.
Saturn's Satellites, 36, 416, 464.
Scammon, Jonathan Y., 188.
Scenery of the Heavens, 181.
Sidereal Universe, The Structure of, 337.
Slough, A Visit to, 52.
Smith, T. A., 143.
Smyth, C. Piazzi. 288, 330.
Solar and Stellar Light, On the Limit of, by Photography, 22.
Solar Corona, by Bigelow, 93.
Solar Eclipse, Total, Dec. 22, 1889, 94.
Solar Hemispheres, Relative Activity of, 109.
Solar Prominences Observed at Camden Observatory, 182, 229, 278, 325, 374, 417, 467.
Solar Observations at Smith Observatory, 467.
Spectroscopic Observations of Binary Stars, 289.
Spectrum of Zeta Ursæ Majoris, 80.
Spitta, E. J., 163, 266.
Stars Having Peculiar Spectra, 379.
Stationary or Long-Enduring Meteor-Radiants, 454.
Stellar Parallax, 234; Table of, 342.
Stellar Systems, Law of Attraction of, 423.
Sunspot Observations, Carleton College Observatory, 136, 230, 280, 325, 418, 468.
Sunspot Observations, Smith Observatory, 137, 182, 230, 278, 375, 417.
Sunspots and the La Grippe, 189.
Sunspots, 182.
Sunspot Note for June, July, August, 1889, l'Astronomie, 137.
Sunspot Notes from Dartmouth Observatory, 183.
Sunspot Photograph by Dr. Janssen, 136.
Swift, Lewis, 47, 189, 472, 474, 475.

T

Tables for Meridian by Elongation of Polaris, 269.
Tatlock, John, 91.
Taylor, J. M., 144.
Taylor, W. C., 286.
Tebbutt Observatory Report, 280.
Telescope Mirror, How it is Made, 353.
Telescope, New, by Brashear, 42.
Telescopes for Sale, 190.
Teneriffe, Alta Vista, Teyde, 392.
The Red Light, 149.
Thornton, John, 336.
Three Interesting Binaries, 385.
Time by the Western Union Telegraph Co., 232.
Time Service, 173.
Time Service of the Western Union, 470.
Transit Observations by Photography, 111.
Transit of Venus, 238.

U

U. S. Scientific Expedition to West Africa, 41, 145, 185, 238, 286, 330.
U. S. Naval Observatory and the Distribution of Time, 57; (1) Mr. Pritchett's Letter on same subject. 62; (2) Superintendent's Letter on the same subject, 63.
Updegraff, Milton, 86.
Upton, Professor W., 140.
United Astronomical Research, 284.

V

Variable Star near Cluster 5, M. Libræ, 381.
Variable Star in Cygnus, New, 232.
Veeder, M. A., 280.
Venus in Daylight, 239.
Very, F. W.. 139.
Velocity of light, 476.

W

Washburn Observatory Publications, 426.
Weld, L. G., 269.
Wendell, O. C., 89, 176. 324, 374, 419, 465.
Wentworth, G. A., 144.
Whitaker, Herbert, 458.
Whiting, Mary W., 49.
Wilson, H. C., 89, 125, 137.
Wilson, W. E., 111.
Wolf-Leavenworth Collections of Astronomical Portraits, 152.
Wolsingham Observatory, 237, 469.
Woods, W. E., 285.
Wright, T. W., 381.

Y

Young, C. A., 27, 90, 95, 233.

Z

Zeta Cancri. System of, 300.
